# Lfteris Oikonomou

## Software Engineer

Driven Software Engineer with a comprehensive Electrical and Computer Engineering background from NTUA. Proven ability of solution-focused development to address real-world challenges. Helping businesses grow, having developed over 15 successful applications for them. Proficient in full-stack web development, from intricate back-end puzzles to slick front-end applications.

## Experience

### 08/2023 - present

Wealthyhood | Athens, Greece

#### Software Engineer

- Developing, maintaining, and extensively testing the dynamic investing app, shipping features daily, and improving the product both in frontend and backend.
- Developed company blog from scratch, integrated with a headless CMS, to drive engagement and provide valuable financial insights to users, contributing to 10x website traffic and user retention in the first 6 months.
- Working within an agile team of 10 engineers & developers in various platforms, exercising effective communication and productive project management.

### 04/2022 - 08/2023

Pobuca | Athens, Greece

#### Software Engineer

- Implemented custom extensions for Pobuca's CRM, enhancing the functionality of Microsoft Dynamics CRM.
- Engineered and launched MonRepo's interactive guided tour application, achieving cross-platform functionality on iOS and Android, and integrating cutting-edge VR, NFC, and BLE technologies for an enhanced user experience.
- Innovated with QR code scanning and AR interactive features, significantly enhancing visitor engagement and interaction in the MonRepo tour app.
- Developed and maintained various large-scale enterprise projects with a million monthly visitors.

### 2021- Present

MyWebsiteArchitects | Athens, Greece

#### Software Engineer

- Developed a variety of websites for over 10 small businesses.
- Developed Blogs and implemented SEO strategies, improving the traffic and user engagement of websites.
